ARYAN AMIT TIWARI

Software Engineer

Developer specializing in AI/ML and data science, focused on delivering scalable, robust production-grade systems. Skilled in building end-to-end pipelines, from data preparation to deployment and performance tuning. Leveraging technical expertise to analyze business challenges, address customer needs effectively, and continuously refine solutions to deliver measurable impact.

WORK EXPERIENCE

Wayspire (Microsoft & Tryst, IIT-Delhi)
A.I. Intern (Remote) 02/2024 - 03/2024

- Designed and deployed end-to-end ML pipelines on Azure, improving model accuracy by 12% and reducing latency by 30%, enhancing performance and project outcomes.
- Incorporated and unit-tested scalable NLP modules for intent classification, achieving 90% accuracy by systematically analyzing model performance and refining algorithms.
- Translated business requirements into technical specifications to deliver features and support implementation for the capstone project.
- Utilized data-driven methodologies to independently analyze and resolve complex technical challenges.

Unified Mentor Pvt. Ltd
Web Dev Intern (Remote) 06/2024 - 07/2024

- Developed and maintained responsive applications using ReactJS, performing optimizations that improved page load times by 25%.
- Performed impact analysis for API integration and optimized database queries and RESTful APIs to maintain high performance.
- Increased code coverage to 85% and enhanced application stability through a comprehensive testing strategy, ensuring quality-driven delivery.
- Consistently learned and collaboratively shared knowledge of new tools and frameworks with team members to enhance product quality and accelerate delivery, fostering a culture of collective technical growth.

PROJECTS

StakePort
- Building a blockchain platform for fractional ownership of high value assets using Web3 tokenization.
- Dividing each asset into digital tokens that represent ownership shares, enabling easy buying, selling, and trading of asset fractions.
- Leveraging a secure and transparent blockchain network to facilitate transactions.
- Lowering investment barriers, improving liquidity, and access to valuable assets while ensuring security and transparency.
- Implementing smart contracts to handle ownership transfers.

LawLens
- Designing a platform to simplify complex legal matters for everyday users.
- Addressing issues ranging from confusing contract clauses to general legal concerns by delivering actionable insights and expert context.
- Utilizing intelligent document analysis powered by cutting edge AI technology.
- Combining AI capabilities with practical legal support to make law more accessible and understandable.

INTERESTS

Interested in finance and investing, exploring predictive analytics and algorithmic strategies to improve decisions in stock and crypto markets. Really into gaming, especially the systems behind it like enemy AI and gameplay mechanics in titles like Ghost Recon and The Last of Us.

EDUCATION

2023 - Present
IIT Madras
- BS in Data Science

2023 - Present
VIT Chennai
- BTech in CSE(AI & ML)

2013 - 2021
DPS Sushant Lok, Gurgaon
- Schooling

SKILLS

- Programming(C, C++, Python, Java, JavaScript, TypeScript, HTML, CSS)
- Databases(MongoDB, SQLite, MySQL, PostgreSQL)
- DevOps(Docker, Git, CI/CD)
- Cloud(AWS, Kubernetes, Azure)
- DSA, OOPS, API Handling
- Opensource, Code review

LANGUAGES

Hindi (Native) German (Novice)
English (Native) French (Novice)

CERTIFICATIONS

NPTEL: EBusiness(IIT-K)
Business Fundamentals(IIT-B)
IBM: Gen AI
Finlatics: Business Analyst
