EXPERIENCE

Wayspire (Microsoft & Tryst, IIT-Delhi), Gurgaon — *A.I. Intern*

Feb 2023 - Apr 2023

Designed and deployed end-to-end ML pipelines on Azure, boosting model accuracy by 12% and reducing latency by 30%.

Engineered NLP modules achieving 90% intent classification accuracy.

Developed and deployed **capstone projects** in collaboration with partner companies, applying theoretical knowledge to real-world challenges.

Unified Mentor Pvt. Ltd., Gurgaon — *Web Dev Intern*

June 2024 - July 2024

Built responsive React.js front-ends, improving page load times by 25%.

Integrated and optimized RESTful APIs and database queries to support high-traffic scenarios.

Instituted unit/integration testing, raising code coverage to 85%.

Finlatics, Gurgaon— *Business Analyst (Project)*

Dec 2023 - Jan 2024

Led market analysis and feasibility studies, crafting a turnaround strategy projecting 20% revenue growth.

Developed interactive Power BI dashboards for KPI visualization, driving a 50K investment decision.

Conducted a **feasibility study** for a potential business setup, leveraging data analytics to assess market opportunities.

SKILLS

Programming: Python, C/C++, Java, JavaScript

ML & Data: TensorFlow, PyTorch, Pandas, NumPy

Web Dev: React.js, Node.js, HTML, CSS

Data Structures & Algorithms: Experience with hands-on practice through coding platforms (e.g., LeetCode, HackerRank)

Visualization & BI: Power BI, Matplotlib, Seaborn

Tools & Platforms: Git, Docker, AWS, Azure

Databases: MySQL, MongoDB

AWARDS

NPTEL Certifications: Funded by Ministry of Education, Government of India

- E-Business - IIT Kharagpur (Elite)
- Business Fundamentals - IIT Bombay (Elite)

PROJECTS

1.Fintech-PropTech

Developing a blockchain-based fractional asset trading platform for high-value investments, focusing on scalability and regulatory compliance. Engineering a real-time valuation system using geospatial APIs (Google Earth) and predictive analytics to track asset price fluctuations. Designing thematic investment portfolios ("baskets") with dynamic rebalancing logic, improving diversification for users.

Key features:

- **Tech Stack:** React.js, Node.js, Express, MongoDB, Firebase Auth, REST APIs, Mapbox (for land visuals), Stripe (for payments).
- Thematic Baskets: Curated portfolios for diversified exposure.

2.Crypto Recommendation App

Developing an app that recommends the best cryptocurrency picks based on market trends, social sentiment, volatility, and technical indicators. The app compares and ranks coins using multiple data-driven parameters and suggests optimized portfolios for users.

Key Features:

- **Tech Used**: React Native, REST APIs, CoinGecko API, Python for backend analysis
- Daily crypto picks
- Data-driven rankings
- Real-time price tracking
- Future plan: AI-powered insights and portfolio tools

EDUCATION

Indian Institute of Technology Madras, Chennai — *B.S.Data Science and Applications.*

2023 - 2027

Honing skills in data-driven decision making, scalable analytics, and real-world problem solving.

Vellore Institute of Technology, Chennai — *B.Tech CSE (AI & ML)*

2023 - 2027

Focus on building intelligent systems and deploying AI-driven solutions, and applying machine learning to real-world problems.

Additional Information

AI & Game Mechanics Enthusiast – I love figuring out how games like *The Last of Us* and *Resident Evil* work—whether it's enemy AI, environment design, or storytelling. I'm especially interested in how AI can make them even more immersive, dynamic, and realistic.

Web & App Experimenter – Constantly building and testing small web apps, scripts, and AI integrations just for fun.

Stock Market Investor & AI in Finance Enthusiast – Actively investing in the stock market while exploring how AI-driven algorithms, predictive analytics, and automation are transforming financial markets.
