ARYAN AMIT TIWARI

Software Engineer **Portfolio**

Developer with hands-on experience in AI/ML and data science, focused on delivering scalable, production grade systems. Skilled in building end-to-end pipelines, from data preparation to deployment and performance tuning. Known for combining strong technical execution with a continuous improvement mindset and the ability to translate business needs into impactful solutions.

WORK EXPERIENCE

Wayspire (Microsoft & Tryst, IIT-Delhi)

A.I. Intern (Remote) FEB 24- APR 24

- Designed and deployed end-to-end ML pipelines on Azure, improving model accuracy by 12% and reducing latency by 30%
- Built and unit-tested scalable NLP modules for intent classification, achieving 90% accuracy and supporting business-critical use cases.
- Collaborated with tech leads and partner companies to support implementation activities for capstone projects, translating business requirements into technical solutions
- Applied a data-driven approach to break down and solve technical challenges independently.

Unified Mentor Pvt. Ltd

Web Dev Intern (Remote) JUN 24 - JUL 24

- Developed and maintained responsive applications using Reactjs, performing optimizations that improved page load times by 25%.
- Performed impact analysis for API integration and optimizing database queries and RESTful APIs to maintain high performance.
- Increased code coverage to 85% and enhanced application stability through a comprehensive testing strategy.
- Continuously learned and applied new tools and frameworks to improve product quality and delivery speed

PROJECTS

Fintech-PropTech

Developing a blockchain-based fractional asset trading platform for high-value investments, focusing on scalability and regulatory compliance.Engineering a real-time valuation system using geospatial APIs (Google Earth) and predictive analytics to track asset price fluctuations. Designing thematic investment portfolios ("baskets") with dynamic rebalancing logic, improving diversification for users.

LawLens

Designed to simplify complex legal matters for everyday users. Whether it's a confusing clause in a contract or a general legal concern, LawLens delivers actionable insights, contextual Reddit wisdom, and intelligent document analysis. It combines cutting-edge AI with practical legal support to make law more accessible and understandable.

INTERESTS

Games and finance have always caught my eye. Whether I'm breaking down Enemy AI in Ghost Recon or exploring how gameplay and environments interact in The Last of Us, I'm fascinated by the systems behind the experience. On the other side, I'm equally hooked on the financial world. actively investing and diving into how predictive analytics and algorithmic strategies shape decisions in stock and crypto markets.

EDUCATION

2023 - Present
IIT Madras
- BS in Data Science

2023 - Present
VIT Chennai
- BTech in CSE(AI & ML)

2013 - 2021
DPS Sushant Lok, Gurgaon
- Schooling

SKILLS

- Programming(C, C++, Python,Java, SQL, JavaScript, TypeScript)
- Databases(MongoDB, Supabase, SQLite, PostgreSQL,MySQL)
- DevOps(Docker, Git, CI/CD)
- Cloud(AWS, Kubernetes, Azure)
- DSA, OOPS, API Handling
- Opensource

LANGUAGES

Hindi (Native) German (Novice)
English (Native) French (Novice)

CERTIFICATIONS

NPTEL: EBusiness(IIT-K)
Business Fundamentals(IIT-B)
IBM: Gen AI
Finlatics: Business Analyst
