ARYAN AMIT TIWARI

Software Engineer **Portfolio**

Developer specializing in AI/ML and data science. I build, deploy, and scale intelligent systems that solve real-world problems. Whether it's wrangling data, debugging weird edge cases, or shipping end-to-end,
I figure it out, get it done, and make it better next time.

WORK EXPERIENCE

Wayspire (Microsoft & Tryst, IIT-Delhi)

A.I. Intern (Remote) FEB 24- APR 24

- Designed and deployed end-to-end ML pipelines on Azure, boosting model accuracy by 12% and reducing latency by 30%.
- Engineered NLP modules achieving 90% intent classification accuracy.
- Developed and deployed capstone projects in collaboration with partner companies, applying theoretical knowledge to real-world challenges.

Unified Mentor Pvt. Ltd

Web Dev Intern (Remote) JUN 24 - JUL 24

- Built responsive Reactjs front-ends, improving page load times by 25%.
- Integrated and optimized RESTful APIs and database queries to support high-traffic scenarios.
- Instituted unit/integration testing, raising code coverage to 85%.

PROJECTS

Fintech-PropTech

Developing a blockchain-based fractional asset trading platform for high-value investments, focusing on scalability and regulatory compliance.Engineering a real-time valuation system using geospatial APIs (Google Earth) and predictive analytics to track asset price fluctuations. Designing thematic investment portfolios ("baskets") with dynamic rebalancing logic, improving diversification for users.

LawLens

Designed to simplify complex legal matters for everyday users. Whether it's a confusing clause in a contract or a general legal concern, LawLens delivers actionable insights, contextual Reddit wisdom, and intelligent document analysis. It combines cutting-edge AI with practical legal support to make law more accessible and understandable.

HIGHLIGHTS

Technical & Analytical Pursuits

My intellectual curiosity extends beyond the workplace as I'm always digging into how complex data-driven systems tick. Whether it's breaking down Enemy AI in Ghost Recon or Gameplay & Environment Interaction in The Last Of Us.
I also like exploring how predictive analytics and algorithmic strategies drive decisions in stock and crypto markets.

Operating Philosophy

I operate with autonomous ownership, confidently breaking down complex challenges using a data-driven, analytical approach.
I value clear communication and collaboration, partnering with cross functional teams to achieve shared goals.
Staying adaptable and focused on continuous learning, I prioritize high-impact work to deliver meaningful results efficiently.

EDUCATION

2023 - Present
IIT Madras
- BS in Data Science

2023 - Present
VIT Chennai
- BTech In CSE(AI & ML)

2013 - 2021
DPS Sushant Lok, Gurgaon
- Schooling

SKILLS

- Programming(C, C++, Python,Java,SQL, JavaScript, TypeScript)
- Databases(MongoDB, Supabase, SQLite, PostgreSQL,MySQL)
- DevOps(Docker, Git, CI/CD)
- Cloud(AWS, Kubernetes, Azure)
- DSA, OOPS, API Handling
- Opensource
